

Air Elemental Leg Prosthetic

Version 1.00 (April 2023)

<https://www.dndbeyond.com/magic-items/6541769-air-elemental-leg-prosthetic>

Wondrous Item, rare (requires attunement by a hour focusing while Prosthetic is connected to wielder)

This prosthetic replaces the leg of the user while giving the user new abilities due to the infusion of the air elemental essence.

This prosthetic can be used as a natural weapon that can add a d6 of **Bludgeoning Damage** to an unarmed strike.

The armor surrounding armor of the prosthetic is made of special iron that can be magically altered to look like the leg of any creature the wielder chooses.

The air elemental essence is stored on the inside of the prosthetic. Using a bonus action, the wielder's speed increase for awhile, as if under the magic of the **Longstrider** spell.

Notes: Natural Weapon: Bludgeoning, hour focusing while Prosthetic is connected to wielder
