

# Athoria +1

Version 1.10 (August 2022)

<https://www.dndbeyond.com/magic-items/5406993-athoria-1>

*Weapon (shortsword), unknown rarity*

This weapon is more than what is seen on the surface. You can communicate with this being in your dreams, and this entity is in 2 of its ten total shards so its' communication and power are severely limited. You get a feeling collecting more shards than the power and abilities will increase.

When attacking with this weapon roll a D20 and on a hit, you do 1D6 Piercing damage.

You have a +1 bonus to attack and damage rolls made with this magic weapon.

Whenever being near a magical weapon this weapon begins to shimmer and rumble. If the two weapons are put close to one another Athoria begins to glow blue and its black splotches or its star constellations expand beyond the sword and the weapons fuse together. Athoria then gains some of the abilities of the magical weapon, and the other weapon seems to disappear. If Athoria already is fused with any other weapon the other weapon pushes out as the other gets fused in. This ability can only happen once per day.

**Currently Fused:** Shortsword +1

When attacking with this weapon roll a D20 + 1 and on a hit, you do 1D6 + 1 Piercing damage.

Proficiency with a shortsword allows you to add your proficiency bonus to the attack roll for any attack you make with it.

*Notes: Finesse, Light*
